Subject: RE: Lane Plating Superfund Site EPA access

Flag: Follow up

Ed,

I tried to reply to your call but your voicemail box is full. I wanted to answer your questions. At this time we have no plans to sample on Oncor property. We would like to use Oncor's transmission line right of way to get access to the creeks behind the site. We believe contamination would be transported to the east of the site, not to the south where the Oncor transmissions lines are. If we find out this is incorrect we may re-evaluate the need to sample the area. It is our intension to sample until we understand the full extent of the contamination. At this time, we do not think there is a pathway for contamination to move from the site to the area where the Oncor transmission lines are located. Let me know if you have any other questions.

Hi Elizabeth,

I remember working with Ms. Storm on the first go around regarding this. I'll reach out to the appropriate in-house counsel for review.

I have a question. How soon do you need a response?

Thank you,

Ed Zarecky, P.G.

Dear Ed,

I am the EPA site attorney for the Lane Plating Superfund Site. EPA is gearing up to do some sampling at the Site and we may need to access areas that Oncor owns or controls. TCEQ shared your contact information and the consent to access forms from back in 2016. I have attached those forms and a new draft consent to access form for EPA. Please take a look and forward it on to your attorney. If you have any questions about the sampling, please let Ken know—I have cc'ed him on this email and his phone number is 214-665-3198. Or please have your attorney contact me with any legal questions. If everything looks good, please sign and return to us!

Sincerely,
Elizabeth

Elizabeth Pletan, Attorney
